

Aeration & Fumigation Systems

FUMIGATION ADVANTAGES

- Reduces need to climb silo
- Safer handling of phosphine tables at ground level
- Efficient control of grain quality
- Fan forced fumigation works by circulating air inside the silo for a more even dose of phosphine gas

AERATION ADVANTAGES

Grain stored in silos isn't always below the recommended moisture level.

Aeration uses fans and ducting to blow outside (ambient) air through grain to keep cool.

Aeration assists grain quality and fumigation in a silo by;

- Reduces mould
- Reduces insect development
- Reduces grain temperature through aeration cooling
- Increase storage longevity

National Grain Solutions - A subsidiary of HE Silos Gunnedah Providing premium onsite grain storage products for the Australian agricultural industry.

AUSTRALIAN MADE & FAMILY OWNED

A family business with a wealth of knowledge and experience, we can confidently assist you in your new purchase. Our silos are engineered to last.

QUALITY

Our skilled staff are equipped to produce top-tier products. We maintain our commitment to quality through a rigorous assurance program, ensuring that each product meets our high standards. All our products are crafted from premium galvanized steel.

WARRANTY

National Grain Solutions offers necessary repairs or replacements under warranty. We differ from others with our follow up service to ensure your product is operating to your needs. Every product is backed by a 5-year warranty to safeguard consumers.

PRODUCT	ADDITIONAL INFORMATION
F500 Aeration Model 140T	0.37KW Fan Producing 350 litres per second
2 x F500 Aeration Model 190T - 305T	2 x 0.37KW Fan Producing 350 litres per second
2 x F650 Aeration Model 500T	2 x 1.5kW Fan Producing 700 liters per second
Roof Vent	Includes cable to open & close from ground level
Fumigation Piping System	Includes piping system from roof to ground level and large phosbox.
